

The 13-Point Google Profile Checklist

Most businesses miss at least 5 of these. How do you score?

7x

more clicks for businesses with complete Google profiles

Source: Google Internal Data, 2026

1. BUSINESS CATEGORY

Your primary category is the strongest signal to Google. Secondary categories (up to 9) expand where you appear. Most businesses only set one.

2. BUSINESS DESCRIPTION

Google now generates AI descriptions from your profile and website. If yours is empty or generic, Google decides what to say about you.

3. BUSINESS HOURS

Including holiday hours, special hours, and service-specific hours. Outdated hours drive customers to competitors who are clearly open.

96% more likely to visit a business that displays hours

4. PHOTOS AND VIDEOS

Google confirms that profiles with photos dramatically outperform those without. Most profiles have fewer than 5 images.

42% more direction requests / 35% more website clicks / 90% more likely to visit

5. GOOGLE POSTS

Updates, offers, and events published directly on your profile. Profiles that post weekly see significantly more views. Most businesses have never posted.

5x more views for regularly updated profiles

6. SOCIAL MEDIA LINKS

Your social content can now appear directly in Google search results. If your profiles are not linked, that visibility is lost.

20% of customers check social media before visiting

7. WHATSAPP OR SMS CHAT

A direct messaging channel on your profile. Most businesses still force customers to call or email. The data says customers want neither.

67% prefer messaging over calling or emailing

Not sure where you stand?

DM me SCORE on Instagram @bryanubink and I will check your profile against this list.

☐ **8. SERVICE LIST**

A detailed list of what you offer, with descriptions. Helps Google match you to specific searches. Most profiles leave this completely blank.

☐ **9. BOOKING BUTTON**

A visible link or button that lets customers book directly from your profile. Removes friction between finding you and choosing you.

77% of consumers expect to book services online

☐ **10. SERVICE AREA**

Defines the geographical region you serve. Google uses this to decide which local searches show your business. You can set up to 20 areas.

☐ **11. BUSINESS ATTRIBUTES**

Details like wheelchair access, free Wi-Fi, insurance accepted, or languages spoken. These show directly on Search and Maps and help customers filter results.

☐ **12. REVIEW MANAGEMENT**

This is not just about collecting reviews. It is about responding to them. The gap between businesses that reply and those that do not is measurable.

91% use reviews to evaluate / 65% more likely to choose you if you respond

☐ **13. MULTIPLE MANAGERS**

If one person has access and leaves, you lose control of your profile. This happens more often than you think. Add a second manager today.

How did you score?

12 – 13

Your profile is ahead of 95% of local businesses. Focus on consistency and reviews.

9 – 11

You are better than most. But the gaps are where your competitors are picking up your clients.

5 – 8

This is where most businesses land. The difference between you and the top result? This checklist.

Under 5

You are invisible to people actively searching for your service. Every day this stays unfixed costs you.
